

I need Airl to remain a FM translator service because it give me a choice in radio stations & offers alternative music that is hard to find. If Airl were to be displaced by LPFM, then my choices in programming would be taken from me. My local community would be deprived of listener friendly radio which creates a welcoming atmosphere in local businesses as well as my own office. I believe the public has a right to continue to have choices like Airl on the FM translator service. Thank you very much.
